HIGH COMFORT LEVELS

LOW BILLS ALL YEAR LONG

With two-stage heating and cooling performance, the Rheem Prestige Series™ Two-Stage Heat Pump equipped with the Comfort Control² System™ lets you keep your comfort level high and your energy bills low so you can simply enjoy being at home.

RPRL-JEC Series
Efficiencies up to 17 SEER

Reduced Energy Bills
Two-stage heating and cooling design operates on high only at peak times, reducing energy usage and electric bills.

Advanced Comfort
The Comfort Control² System actively keeps your home comfortable and your heat pump running smoothly through 32 performance-monitoring points when paired with a matching indoor component and thermostat.

Guaranteed Reliability
Quality construction ensures quiet operation, better protection against the elements and long-lasting performance backed by a 10-year limited parts and conditional total unit replacement warranty.
The Comfort Control² System
When paired with a compatible indoor component and thermostat, this advanced technology makes it easy to maximize your family’s comfort and utility cost savings. The Comfort Control² System ensures your Rheem Prestige Series heat pump runs at top efficiency by actively monitoring your equipment — measuring temperature and relative humidity while providing detailed diagnostics that make it easy for your contractor to perform repair and maintenance. It also includes routine reminders for air filter changes.

Enjoy the Benefits of Smart Heat Pump Technology
The Rheem Prestige Series Two-Stage Heat Pump featuring the Comfort Control² System is designed for maximum efficiency, offering smart technology that helps your family enjoy the highest level of comfort, while lowering energy use and electricity bills.

Energy Savings
Two-stage heating and cooling design operates on low most of the time, providing comfortable temperatures while reducing energy use. The system only operates on high when necessary during peak weather conditions. Your energy savings are further increased by cooling and heating efficiency ratings up to 17 SEER and 9.5 HSPF.

Greater Comfort
When matched with a Rheem variable speed furnace or air handler, the system adjusts airflow to help control humidity 102% more effectively than standard efficiency units, for unsurpassed comfort in cooling and heating modes.

Maximum Efficiency
The Rheem Prestige Series Two-Stage Heat Pump meets a full range of comfort requirements. In locations with colder winters, create a hybrid or dual-fuel solution by installing a heat pump and furnace, which provides two options for the most cost-effective and efficient heat source depending on the outdoor temperature, delivering reduced energy bills – no matter the size of your home.

Curb Appeal
Low-profile design blends in with the exterior of your home and is less likely to obstruct views from exterior windows.

Enjoy Long-Lasting Quality and Comfort
We understand that purchasing heating and cooling equipment is an investment. With Rheem, it’s one you can expect to continually perform and deliver value for your family long-term. We’ve designed the Rheem Prestige Series to provide comfort you can count on while enjoying a return on your investment.

Protective Design
Full metal cabinet protects the coil from hail, lawn debris and keeps children safe.

Superior Finish
Powder-painted metal cabinet finish exceeds the industry 1,000 hour salt-spray testing requirement, guarding against the elements and rust, keeping your investment visually pleasing.

Rheem Quality
Complete factory run testing ensures your Rheem equipment operates at peak performance before being installed in your home.

Benefits At-A-Glance
Cooling Efficiency:
Up to 17 SEER/13 EER
Heating Efficiency:
Up to 9.5 HSPF
Available Sizes:
2, 3, 4 & 5 ton
Compressor:
Two-Stage Scroll® compressor
Compatible Controls:
Comfort Control² communicating or standard programmable and non-programmable thermostats
Sound Level:
As low as 71 dB
Refrigerant:
Industry standard R-410A
Limited Warranty**:
Conditional total unit replacement warranty - 10 years
Parts warranty - 10 years
